26.1 Chapter Introduction

26.2 Learning Objectives

26.3 Exercise 26 -- Cardinality Restrictions and Data Completeness

26.4 The Anatomy of an Executable Ontology

Syntheses of the five primitives + EKA mapping

26.5 Mathematical Perspective

Closure as set restriction, enumeration as finite extension, `hasValue1` as singleton binding, cardinality as bounded extension

26.6 Historical Perspective

From expert systems and production rules to modern rule engines and executable knowledge

26.7 Industrial Perspective

ISA-95 / Rhize and the reasoning-to-execution pipeline in manufacturing

26.8 EKA Perspective -- Stage 7 Establishes $\Theta + \Phi$

26.9 Engineering Guidelines for Executable Knowledge

26.10 Key Concepts

26.11 Chapter Summary

26.12 Looking Ahead -- Toward SKDL Synthesis
